

Joanne Hunter

Product Design

About

I recently graduated from Leeds Metropolitan University's BA honours design course.

My design focus is on product design but I also have an interest in system/service design.

I see myself as a problem solver aiming to design long-term solutions with environmental and social sustainability in mind.

I am familiar with the design process, taking a project from the concept stage through to production and I have a range of skills that include drawing, CAD modelling and model making.

I am competent working in groups or individually and have nine years of work experience in retail and accounts environments.

Education

- 2014 **BA honours Design**
Leeds Metropolitan University
- 2002 **General Art and Design GNVQ**
Blackburn College
- 1999 **5 A-C GCSEs Including Maths and English**
